**DETAILED ACTION**

**Notice to Applicant**

1. This communication is in response to the Remarks filed on 10/12/06. Claims 175-186 and 199-208 are pending.

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 175-186 and 199-208 are rejected under 35 U.S.C. 103(a) as being unpatentable over Perry et al (5,241,466) in view of Krim (2002/0072925) and further in view of Mindrum et al (6,340,978), for substantially the same reasons given in the previous Office Action, and incorporated herein. Further reasons are presented hereinbelow.

***Response to Arguments***

3. Applicant's arguments filed 10/12/06 with respect to 175-186 and 199-208 have been fully considered but they are not persuasive.

(A) At pages 2-10, Applicant's argues the followings:

- (a) A prima facie conclusion of obviousness has not been established based upon Perry, Krim and Mindrum.

Art Unit: 3627

(b) There is no motivation or suggestion to combine Krim, Perry and Mindrum.

Nevertheless, their combination does not teach or suggest each and every limitation of the two independent claims 175 and 199, as required to support a prima facie conclusion of obviousness.

(c) Mindrum does not teach, suggest or disclose in any way or form providing to the user "guidance information" regarding future healthcare choice, as that term is used and described in the present information; "providing to the user an "elective" or choice regarding future healthcare and "providing to the user reference information" regarding these future healthcare electives.

(d) Mindrum does not provide "analysis information to the input user. As described in the specification, analysis information is "qualitative and quantitative information about specific medical conditions and corresponding treatments (including end-of-life condition responses) that are relevant to the participant.

(B) With respect to Applicant's first and second arguments, Examiner respectfully submitted that obviousness is not determined on the basis of the evidence as a whole and the relative persuasiveness of the arguments. See *In re Oetiker*, 977F. 2d 1443, 1445, 24 USPQ2d 1443, 1444 (Fed. Cir. 1992); *In re Hedges*, 783F.2d 1038, 1039, 228 USPQ 685, 686 (Fed. Cir.1992); *In re Piaseckii*, 745 F.2d 1468, 1472, 223 USPQ 785, 788 (Fed. Cir.1984); *In re Rinehart*, 531 F.2d 1048, 1052, 189 USPQ 143, 147 (CCPA 1976). Using this standard, the Examiner respectfully submits that he has at least satisfied the burden of presenting a prima facie case of obviousness, since he has

Art Unit: 3627

presented evidence of corresponding claim elements in the prior art and has expressly articulated the combinations and the motivations for combinations that fairly suggest Applicant's claimed invention (See the previous Office Action). Note, for example, in the instant case, the Examiner respectfully notes that each and every motivation to combine the applied references are accompanied by select portions of the respective reference(s) which specially support that particular motivation and /or an explanation based on the logic and scientific reasoning of one ordinarily skilled in the art at the time of the invention that support a holding of obviousness. As such, it is not seen that the Examiner's combination of references is unsupported by the applied prior art of record. Rather, it is respectfully submitted that explanation based on the logic and scientific reasoning of one of ordinarily skilled in the art at the time of the invention that support a holding of obviousness has been adequately provided by the motivations and reasons indicated by the Examiner, *Ex parte Levengood*, 28 USPQ2d 1300(Bd. Pat. App. & Inter., 4/22/93). Therefore, the combination of references is proper and the rejection is hereby sustained.

In addition, the Examiner recognizes that references cannot be arbitrarily altered or modified and that there must be some reason why one skilled in the art would be motivated to make the proposed modifications. However, although the Examiner agrees that the motivation or suggestion to make modifications must be articulated, it is respectfully contended that there is no requirement that the motivation to make modifications must be expressly articulated within the references themselves.

References are evaluated by what they suggest to one versed in the art, rather than by

Art Unit: 3627

their specific disclosures, *In re Bozek*, 163 USPQ 545 (CCPA 1969). Therefore, Applicant's argument is not persuasive.

In addition, with specific reference to Applicant's remarks about the Mindrum, Krim and Perry references, the Examiner respectfully submits that it is sufficient to demonstrate that the prior art meets the limitations as claimed, whether by a single instance or scenario, or in every possible preferred embodiment, since it was determined in *In re Lamberti et al*, 192 USPQ 278 (CCPA) that:

- (i) obviousness does not require absolute predictability;
- (ii) non-preferred embodiments of prior art must also be considered; and
- (iii) the question is not express teaching of references, but what they would

suggest. Therefore, Applicant's argument is not persuasive and the rejection is hereby sustained.

(C) With respect to Applicant's third argument, Examiner respectfully submitted that He relied upon the clear and unmistakable teaching of Krim Page 5, Paragraphs 0064-0065). Therefore, Applicant's argument is not persuasive and the rejection is hereby sustained.

(D) With respect to Applicant's fourth argument, Examiner respectfully submitted that He relied upon the clear and unmistakable teaching of Krim Page 2, Paragraphs 0027). Therefore, Applicant's argument is not persuasive and the rejection is hereby sustained.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
